

ELIAN JORGE NAHUEL

Full Stack Developer | Backend

[Buenos Aires, Argentina](#) | elian.nahuel0348@gmail.com | github.com/eliann313 | linkedin.com/in/eliannahuel | elian-nahuel-portfolio.vercel.app

PROFESSIONAL PROFILE

Full Stack Developer focused on backend development, currently pursuing a Bachelor's degree in Data Science. Experience working with multi-tenant systems, data synchronization, and AI-integrated SaaS products using Python (FastAPI), Node.js, Next.js, and React. Self-driven learner with a strong focus on software engineering best practices and building scalable solutions.

TECHNOLOGIES & TOOLS

Backend: Python (FastAPI), Node.js (Express), Next.js (App Router) C# (OOP & Concurrency knowledge)

Frontend & Mobile: React (TSX), Next.js, Angular, Ionic, TypeScript, JavaScript, Tailwind, HTML, CSS

Databases: PostgreSQL (Neon), MongoDB, SQLite

ORM / ODM / Migrations: Prisma, SQLAlchemy, Alembic, Mongoose

IA & APIs: Vercel AI SDK, Gemini API

Tools & Environment: Git, GitHub, Docker, Linux, CI/CD, Auth.js, Vercel, Playwright, Vitest

PROJECTS

SkillRadar | SaaS Connecting Developers & Recruiters | Personal Project

- Created and led the end-to-end design and full-stack implementation of a dual-role (developer/recruiter) platform, featuring a guided workflow: CV Analysis → Job Match → AI-assisted Mock Interview.
- Implemented a double-blind privacy system (server-side PII sanitization until candidate approval) and mitigated SSRF risks using short-lived signed URLs.
- Developed Career Copilot, an AI chatbot with dynamic role-tailored behavior, and built a multi-provider AI routing system (Gemini, Groq, OpenRouter) via Vercel AI SDK, supporting user-provided API keys (OpenAI, Anthropic, etc.).
- Encrypted sensitive data with AES-256-GCM and achieved comprehensive test coverage using Vitest (unit) and Playwright (E2E) integrated into CI/CD pipelines (GitHub Actions).

Stack: Next.js 16 (App Router), TypeScript, Prisma, Auth.js v5, Vercel AI SDK, Tailwind CSS, Vitest, Playwright.

GridHub WMS | Multi-tenant logistics management system | in development

- Contributed to the design of a multi-tenant backend architecture with client-level data isolation using FastAPI and SQLAlchemy.
- Participated in relational data modeling and database migration management with Alembic.
- Collaborated on defining a layered architecture (Onion Architecture).
- Contributed to developing frontend modules in React (TSX) integrated with the backend via REST APIs.
- Worked collaboratively using Trello and Agile methodologies.

Stack: Python, FastAPI, SQLAlchemy, Alembic, React (TSX), SQLite.

Other Projects

Pochocleando — Movie and TV show review app featuring an integrated AI assistant (Angular, Node.js, MongoDB, Gemini API).

PokeApp — Hybrid web/mobile application integrated with PokeAPI (Ionic, Angular, Firebase).

EDUCATION

Bachelor's Degree in Data Science — 2026 - Present
Universidad de la Ciudad Autónoma de Buenos Aires

Higher Technical Degree in Software Development — 2023 - 2025
Instituto de Formación Técnica Superior N°11

LANGUAGES

Spanish (Native) | English A2-B1 (Intermediate — technical reading and basic communication)
